Pregled politika EU-a u pitanjima zaštite okoliša i klimatskih promjena

Conceptual overview: The external dimension of European climate policy

CC BY 4.0

Climate change impacts in Europe's regions

Climate change is projected to impact the availability of water in Europe, putting additional pressure on southern regions already facing water stress. Other parts of Europe are expected to face more frequent flooding events, while low-lying regions are at risk from storm surges and sea level rise.

Source: EEA Report No 01/2017 — Climate change, impacts and vulnerability in Europe 2016.

Mediterranean region

- Large increase in heat extremes
- Decrease in precipitation and river flow
- Increasing risk of droughts
- Increasing risk of biodiversity loss
- Increasing risk of forest fires
- Increased competition between different water users
- Increasing water demand for agriculture
- Decrease in crop yields
- Increasing risks for livestock production
- Increase in mortality from heat waves
- Expansion of habitats for southern disease vectors
- Decreasing potential for energy production
- Increase in energy demand for cooling
- Decrease in summer tourism and potential increase in other seasons
- Increase in multiple climatic hazards
- Most economic sectors negatively affected
- High vulnerability to spillover effects of climate change from outside Europe

Boreal region

- Increase in heavy precipitation events
- Decrease in snow, lake and river ice cover
- Increase in precipitation and river flows
- Increasing potential for forest growth and increasing risk of forest pests
- Increasing damage risk from winter storms
- Increase in crop yields
- Decrease in energy demand for heating
- Increase in hydropower potential
- Increase in summer tourism

Continental region

- Increase in heat extremes
- Decrease in summer precipitation
- Increasing risk of river floods
- Increasing risk of forest fires
- Decrease in economic value of forests
- Increase in energy demand for cooling

Atlantic region

- Increase in heavy precipitation events
- Increase in river flow
- Increasing risk of river and coastal flooding
- Increasing damage risk from winter storms
- Decrease in energy demand for heating
- Increase in multiple climatic hazards

Coastal zones and regional seas

- Sea level rise
- Increase in sea surface temperatures
- Increase in ocean acidity
- Northward migration of marine species
- Risks and some opportunities for fisheries
- Changes in phytoplankton communities
- Increasing number of marine dead zones
- Increasing risk of water-borne diseases

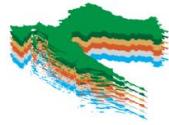

Arctic region

- Temperature rise much larger than global average
- Decrease in Arctic sea ice coverage
- Decrease in Greenland ice sheet
- Decrease in permafrost areas
- Increasing risk of biodiversity loss
- Some new opportunities for the exploitation of natural resources and for sea transportation
- Risks to the livelihoods of indigenous peoples

Mountain regions

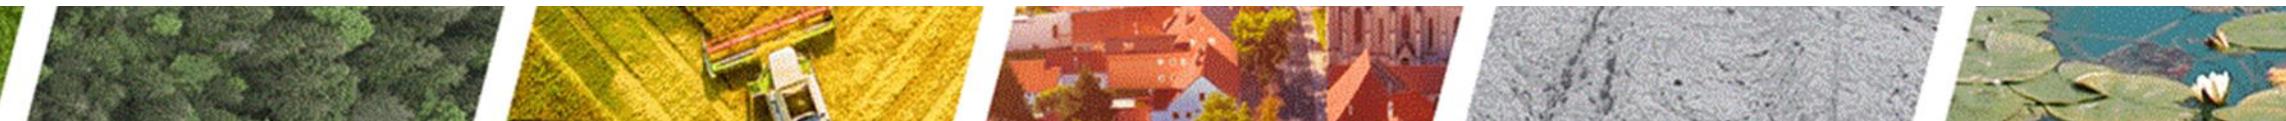

- Temperature rise larger than European average
- Decrease in glacier extent and volume
- Upward shift of plant and animal species
- High risk of species extinctions
- Increasing risk of forest pests
- Increasing risk from rock falls and landslides
- Changes in hydropower potential
- Decrease in ski tourism

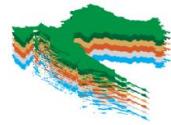

Važnost prostornih podataka u EU politikama

- provedena je sveobuhvatna analiza **23 zakonodavna akta** Europske unije iz područja klimatske, okolišne i energetske politike s posebnim fokusom na zahtjeve za **prostornim podacima**
 - identifikaciju konkretnih zahtjeva koji proizlaze iz pravnih odredbi – uključujući članke, stavke i anekse, a koji se odnose na **potrebu za prostornim podacima (*spatial data*)**.
- cilj je utvrditi **koji točno zakonski elementi uvjetuju postojanje, dostupnost, točnost i ažurnost prostornih podataka** nužnih za provedbu propisa na nacionalnoj razini.

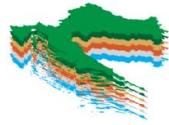

Važnost prostornih podataka u EU politikama

- za svaki identificirani zahtjev provedena je **stručna procjena** razine dostupnosti prostornih podataka u Republici Hrvatskoj koristeći sljedeće tri kategorije:
 - **Complete** – prostorni podaci su **potpuno dostupni** na nacionalnoj razini, u odgovarajućem formatu, prostornoj rezoluciji i s potrebnom razinom ažurnosti za provedbu zakonskih obveza.
 - **Half Complete** – djelomična dostupnost: dio traženih prostornih podataka postoji, dok su preostali podaci ili nedostupni, zastarjeli ili ne zadovoljavaju potrebnu prostornu razlučivost i kvalitetu. U ovoj kategoriji najčešće su **potrebna dodatna ažuriranja i razvoj**.
 - **No Data** – potpuni izostanak odgovarajućih/potrebnih prostornih podataka u nacionalnom sustavu. Za provedbu zahtjeva u toj kategoriji **potrebno je novo istraživanje**, razvoj metodologija i/ili stvaranje potpuno novih skupova podataka.

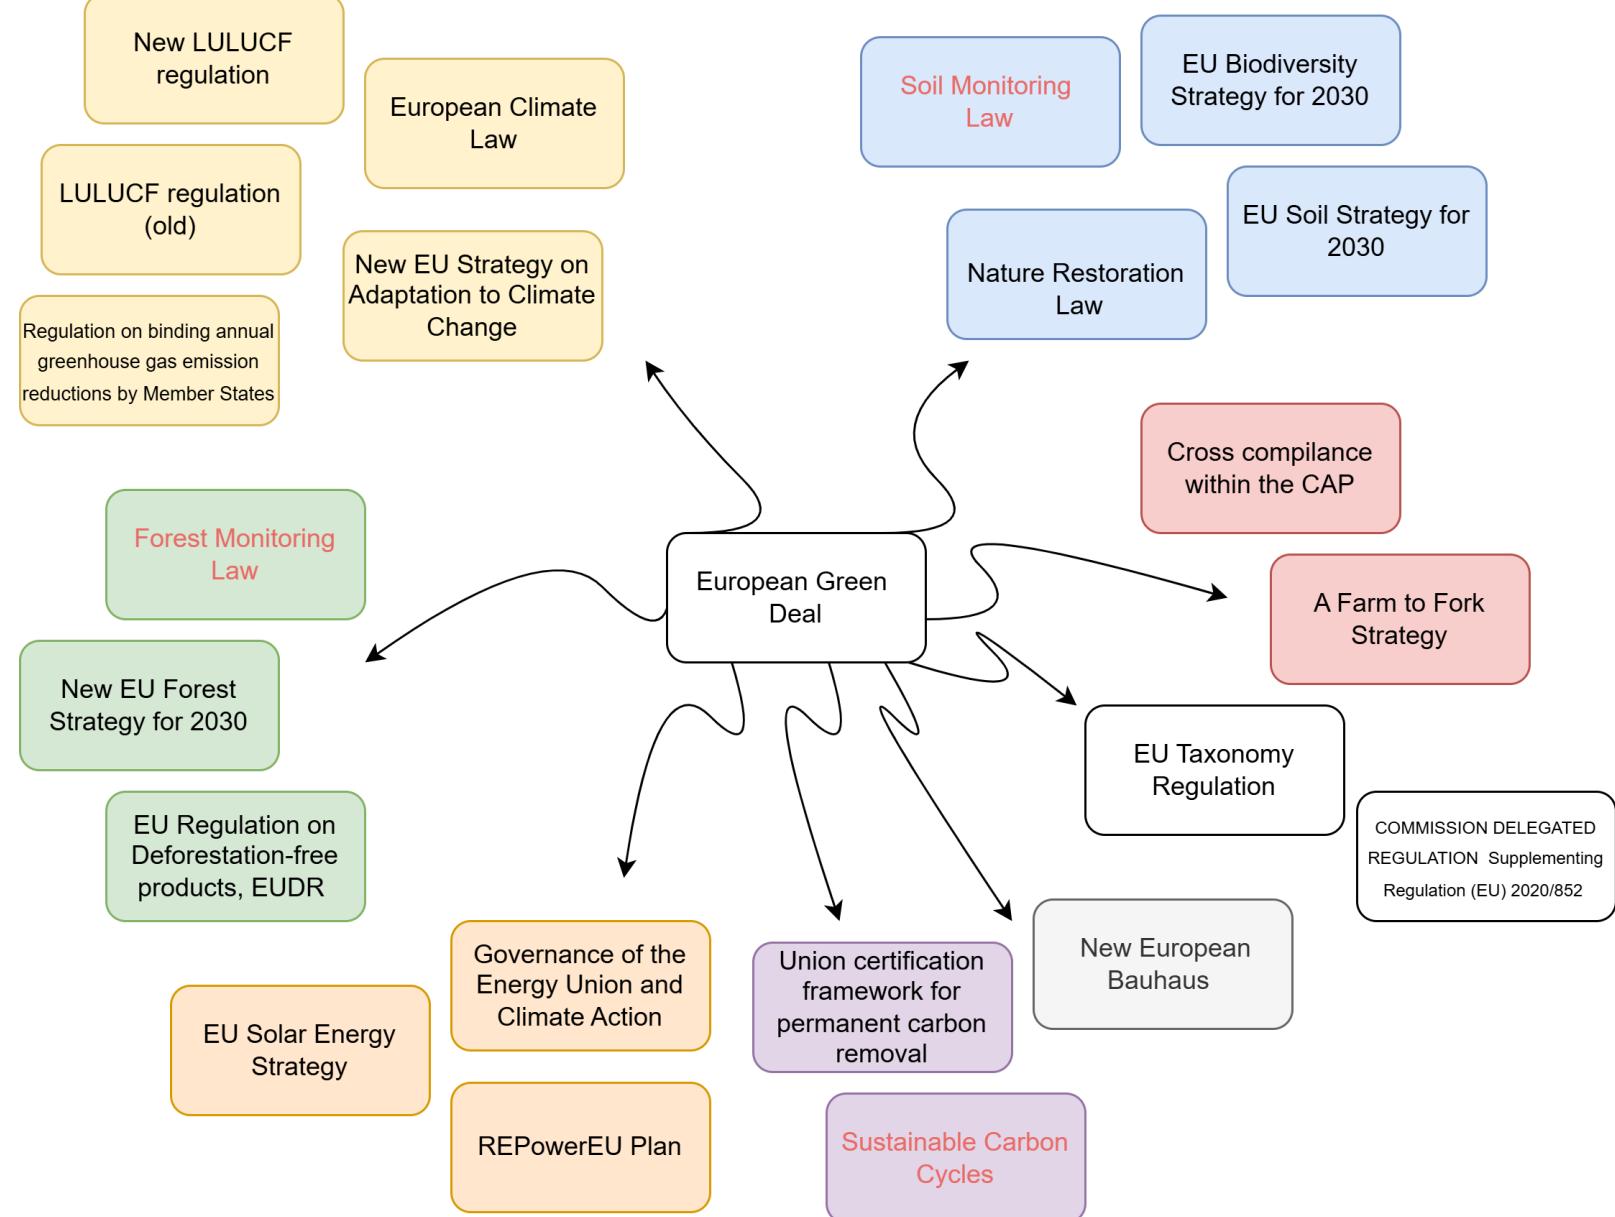

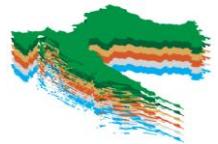

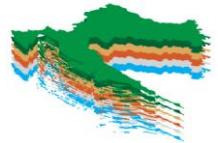

Važnost prostornih podataka u EU politikama

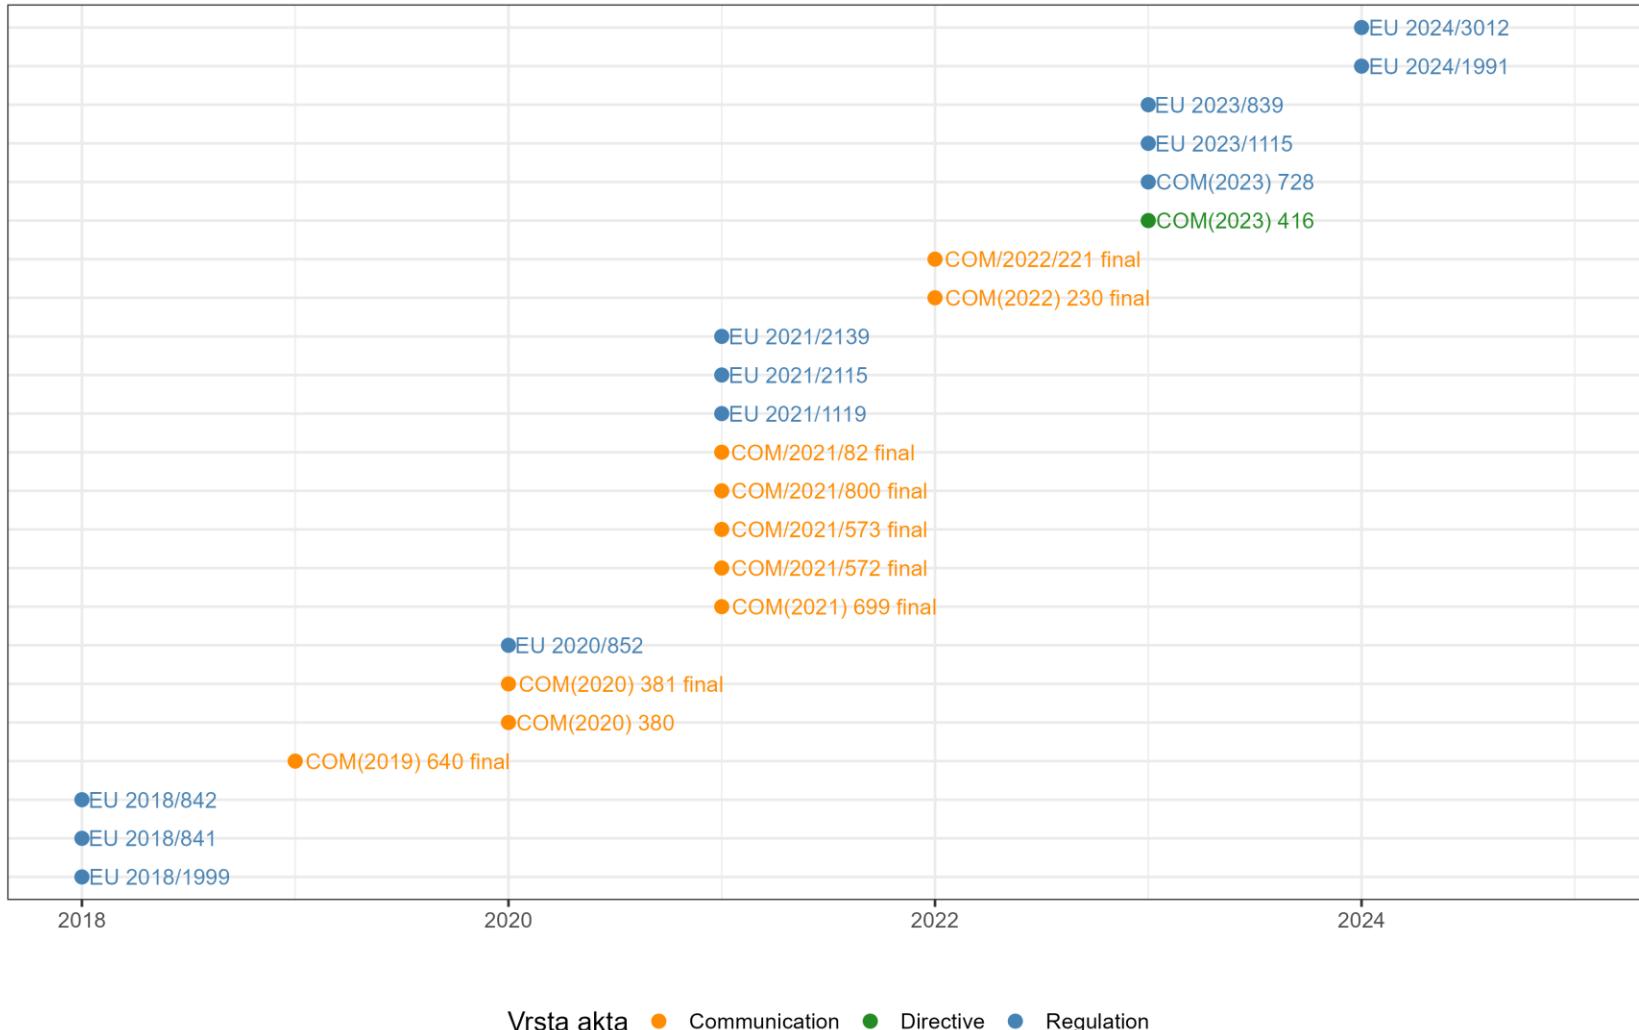

- Cilj ovakve analize je omogućiti relevantnim institucijama i donositeljima odluka da:
 - precizno identificiraju “podatkovne praznine” u provedbi EU propisa,
 - gdje nedostaju prostorni podaci ključni za provedbu propisa.
 - planiraju ciljana ulaganja u podatkovnu infrastrukturu i razvoj,
 - prioritizirati ulaganja u razvoj, ažuriranje i harmonizaciju prostornih podataka.
 - uključiti sve relevantne dionike – od državnih tijela, znanstvenih institucija do privatnog sektora.
 - optimiziraju nacionalne sustave praćenja i izvještavanja u skladu s obvezama iz Europskog zelenog plana te klimatskog zakonodavstva.
 - učinkovito i pravovremeno izvještavanje prema EU obvezama.
 - kreiranje pouzdanih modela za klimatsku prilagodbu, prostorno planiranje, upravljanje rizicima...

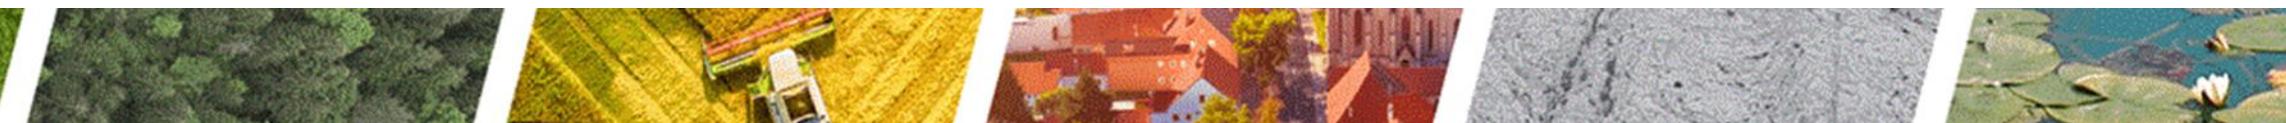

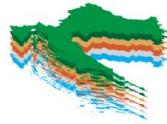

EU Legislativni akti

Vrsta akta ● Communication ● Directive ● Regulation

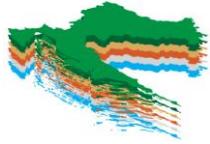

Važnije EU regulative u domeni zahtjeva za prostornim podacima

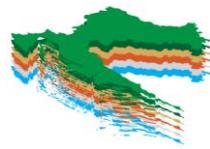

- Regulation (EU) 2023/839 (*New LULUCF regulation*) (+ Regulation (EU) 2018/841)
- Regulation (EU) 2024/1991 (*Nature Restoration Law*)
- Regulation COM(2023) 728 (*Forest Monitoring Law*)
- Directive COM(2023) 416 (*Soil Monitoring Law*)
- Regulation (EU) 2024/3012 (*Union certification framework for permanent carbon removal*)
- Regulation (EU) 2021/2115 (*Cross compliance within the CAP*)

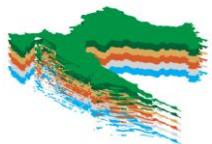

No.	Legislation	Name of legislation	Article or Annex number	Short description from column D	Spatial or other data type stated in column D	Spatial or other data type subcategories	Spatial data or other data type also defined in:	Spatial data defined in column H	hat data is missing / will be needed	hat data is available? (source OR name)	Data completeness	
2	Regulation (EU) 2018/841	LULUCF regulation (old)	Article 2	(a) Article 2... that occur in any of the following land accounting categories on the territories of Member States, during periods 2021-2025 and from 2026-2030	(i) aforested land : land use reported as cropland, grassland, wetlands, settlements or other land, converted to forest land	land use reported as cropland, grassland, wetlands, settlements or other land, converted to forest land;				data for whole historical period	Spatial data for L-L (national data)	<input checked="" type="checkbox"/> Complete
					(ii) deforested land : land use reported as forest land converted to cropland, grassland, wetlands, settlements or other land	land use reported as forest land converted to cropland, grassland, wetlands, settlements or other land;				data for whole historical period	Spatial data for FL-L (national data)	<input checked="" type="checkbox"/> Complete
					(iii) managed cropland : cropland remaining cropland, grassland, wetland, settlement or other land, converted to cropland, or cropland converted to wetland, settlement or other land	CL-CL, L-CL				data on conversion from aCL and pCL, not all data from ARKOD available	CLC data, data from ARKOD and Ministry of Agriculture	<input checked="" type="checkbox"/> Half Complete
					(iv) managed grassland : wetland remaining grassland, cropland, wetland, settlement or other land, converted to grassland, or grassland converted to wetland, settlement or other land	GL-GL, L-GL				no full data on managed grasslands, no data from conversion	CLC data, data from ARKOD and Ministry of Agriculture	<input checked="" type="checkbox"/> Half Complete
					(v) managed forest land : land use reported as forest land remaining forest land	FL-FL, L-FL				national data	<input checked="" type="checkbox"/> Complete	
				(b) Article 2... that occur in any of the following land accounting categories on the territories of Member States, as of 2026	managed cropland : wetland remaining wetland, settlement or other land, converted to wetland, or wetland converted to settlement or other land	WL-WL, L-WL				no precise spatial data available	CLC data, data from NKS (shp)..	<input checked="" type="checkbox"/> Half Complete
		ANNEX VI		background level for natural disturbances	5...identification of all land areas affected by natural disturbances in that particular year, including their geographical location, the period and types of natural disturbances	areas affected with natural disturbances				precise areas affected by disturbances by land categories	areas affected by forest fires, forest stands affected by wind, biotic and fire disturbances??	<input checked="" type="checkbox"/> Half Complete
3	Regulation (EU) 2021/1119	European Climate Law		(7)...all sectors of the economy, including energy, industry, transport, heating and cooling and buildings, agriculture, waste and land use, land-use change and forests, irrespective of whether those sectors are covered by the system for greenhouse gas emission allowance trading within the Union (EU ETS); should play a role in contributing to the achievement of climate neutrality within the Union by 2050.	LULUCF land categories	-	-			spatial explicit data required for LULUCF land categories	CLC data, national data on forests...	<input checked="" type="checkbox"/> Half Complete
4	Regulation (EU) 2024/1991	Nature Restoration Law	Article 2	(a) Regulations applies in the territory of the Member States ; (b) coastal waters and (c) in waters, the seabed or subsoil on the seaward side of the baseline from which the extent of the territorial waters of a Member State is measured	MS territory	-				land and sea spatial data		<input checked="" type="checkbox"/> Half Complete
			Article 4	Restoration of terrestrial, coastal and freshwater ecosystems , Annex I list for habitat types that are not in good condition	terrestrial, coastal and freshwater ecosystems					areas for restoration need to be defined and mapped	NATURA 2000 sites, NSK areas, CLC areas...	<input checked="" type="checkbox"/> Half Complete
				...until 2030 give priority to restoration measures in areas that are located in Natura 2000 sites.	areas inside NATURA 2000					restoration measures in areas that are located in Natura 2000 sites	NATURA 2000 areas	<input checked="" type="checkbox"/> Half Complete
				7...Member States shall put in place restoration measures for the terrestrial, coastal and freshwater habitats of the species listed in Annexes II, IV and V to Directive 92/43/EEC and of the habitats or wild birds falling within the scope of Directive 2009/147/EC that are in addition to the restoration measures referred to in paragraphs 1 and 4 of this Article			Directive 92/43/EEC, Directive 2009/147/EC			areas for restoration measures need to be defined	NATURA 2000 areas, protection areas...	<input checked="" type="checkbox"/> Half Complete
			Article 5	Restoration of marine ecosystems; habitat types listed in Annex II which are not in good condition	marine ecosystems, listed in Annex II					areas for restoration measures need to be defined		<input checked="" type="checkbox"/> Half Complete
				1. Member States shall put in place the restoration measures that are necessary to improve to good condition areas of habitat types listed in Annex II which are not in good condition	listed in Annex II					areas for restoration need to be defined and mapped	NKS_v5	<input checked="" type="checkbox"/> Half Complete
			Article 8	Restoration of urban ecosystems ; 1 by 31 December 2030, Member States shall ensure that there is no net loss in the total national area of urban green space and of urban tree canopy cover in urban ecosystem areas, determined in accordance with Article 14(4), compared to 2024.	LAU (local administrative unit), urban green space, urban areas, cities, urban centres, towns and suburbs, peri-urban areas, urban tree canopy cover		Regulation (EC) No 1059/2003 (Article 4, LAU)			national data on green urban areas	Copernicus Urban Atlas Land Cover/Land Use, High Resolution Layer Small Woody Features, GIS portal for trees	<input checked="" type="checkbox"/> No Data
				2. From 1 January 2031, Member States shall achieve an increasing trend in the total national area of urban green space, including through the integration of urban green space into buildings and infrastructure, in urban ecosystem areas	urban green spaces, settlements							
				3. Member States shall achieve an increasing trend of urban tree canopy cover, measured every six years from 1 January 2031, until the satisfactory level identified as set in accordance with Article 14(8) is reached	urban tree canopy cover (basis of the Tree Cover Density data under Copernicus)		Regulation (EU) 2021/636			urban tree canopy cover, available only for some cities	Copernicus High Resolution Layer Tree Cover, Urban Atlas Land Cover/Land Use	<input checked="" type="checkbox"/> Half Complete
			Article 9	Restoration of the natural connectivity of rivers and natural functions of the related floodplains	rivers, floodplains, wetlands					new wetland data	TTB (hydrology)	<input checked="" type="checkbox"/> Half Complete
			Article 11	Restoration of agricultural ecosystems	agriculture lands					agriculture areas suitable for restoration	ARKOD, CLC data	<input checked="" type="checkbox"/> Half Complete
				1. Member States shall put in place the restoration measures necessary to enhance biodiversity in agricultural ecosystems; in addition to the areas that are subject to restoration measures under Article 4(1), (4) and (7)	agriculture areas within NATURA 2000 sites	Annex 4 and Article 4(14,7) habitat types in Annex I, Annex II, Annex III, Annex IV and V to Directive 92/43/EEC and of the terrestrial, coastal and freshwater habitats of wild birds falling within the scope of Directive 2009/147/EC				ARKOD data only for agriculture areas under EAFFD	ARKOD, CLC data	<input checked="" type="checkbox"/> Half Complete
				2. Member States shall put in place measures which shall aim to achieve an increasing trend at national level of at least two out of the three following indicators for agricultural ecosystems, as further specified in Annex IV, measured in the	Annex 4, list of biodiversity indicators for agro-ecosystems referred in Article 11(2)	Annex 4 - Stock of organic carbon in cropland mineral soils, share of agricultural land with high-diversity landscape features				precise areas of stock of organic carbon in cropland mineral soils	ARKOD, CLC data	<input checked="" type="checkbox"/> Half Complete
				3. Member States shall put in place restoration measures which shall aim to ensure that the common farmland bird index at national level based on the species specified in Annex V, indeed on 1 September 2025	agriculture lands	Annex 5 (common farmland bird index at national level)				identification of area suitable for restoration	NATURA 2000 areas, ARKOD data, NKS	<input checked="" type="checkbox"/> Half Complete
			4. Member States shall put in place measures which shall aim to restore organic soils in agricultural use constituting drained peatlands.	organic soils in drained agricultural use constituting drained peatlands						peatlands areas, areas of organic soils (very small areas in Croatia, around 250 ha)	TTB (wetlands), geokemikalji atlas, FAO UNESCO pedologika karta	<input checked="" type="checkbox"/> Half Complete
		Article 12	Restoration of forest ecosystems	forest land, forest areas, forests under NATURA 2000 areas							data from Croatian forests, data from Ministry of agriculture	<input checked="" type="checkbox"/> Complete

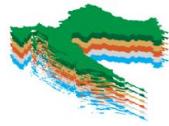

Spatial or other data type stated in column D	Spatial or other data type subcategories	Spatial data or other data type also defined in:	Spatial data defined in column H	What data is missing / will be needed ?	What data is available? (source OR name)	Data completeness
(a) ...land use units with high-carbon stock land	-	(EU) 2018/2001, Article 29 (4), Regulation (EU) 2018/1999	wetlands, continuously forested areas (>1ha, >5m, c.c. >30%), land spanning more than one hectare with trees higher than five metres and a canopy cover of between 10 % and 30 %, or trees able to reach those thresholds in situ...	soil data (precise areas with high carbon stock data), high-res wetland areas	Croatian forests data, NKS_v5, TTB (wetland use)	🟡 Half Complete
(b)...land use units subject to protection	...land with a high biodiversity value as defined in Article 29(3) of Directive (EU) 2018/2001	Directive (EU) 2018/2001, Article 29 (3)	a) primary forest and other wooded land, b) highly biodiverse forest and other wooded land which is species-rich and not degraded, c) areas designed by law or by the relevant competent authority for nature protection purposes, areas designated for the protection of rare, threatened or endangered ecosystems or species recognised by international agreements (IUCN), d) highly biodiverse grassland (>1ha), natural, namely grassland that would remain grassland in the absence of human intervention, non-natural, namely grassland that would cease to be grassland in the absence of human intervention and that is species-rich and not degraded and has been identified as being highly biodiverse	new spatial data on primary and old-growth forest, (new) high resolution data on highly biodiverse grassland	Croatian forests shp data, NKS_v5, ARKOD	🟡 Half Complete
	...special areas of conservation designated in accordance with Article 4 of Council Directive 92/43/EEC (*) and land units outside of those which are subject to protection and conservation measures under Article 6(1) and (2) of that Directive in order to meet site conservation objectives;	The Habitats Directive (Council Directive 92/43/EEC)	SAC Areas (Annex I, Habitats Directive)	areas which are subject to protection measures	NKS_v5, Karta kopnenih nešumskih staništa (2016), Karta staništa RH (2004)	✅ Complete

Article 8	Restoration of urban ecosystems, 1. by 31 December 2030, Member States shall ensure that there is no net loss in the total national area of urban green space and of urban tree canopy cover in urban ecosystem areas,, determined in accordance with Article 14(4), compared to 2024. 2. From 1 January 2031, Member States shall achieve an increasing trend in the total national area of urban green space, including through the integration of urban green space into buildings and infrastructure, in urban ecosystem areas 3. Member States shall achieve, in each urban ecosystem area, determined in accordance with Article 14(4), an increasing trend of urban tree canopy cover, measured every six years from 1 January 2031, until the satisfactory level identified as set in accordance with Article 14(5) is reached	LAU (local administrative unit), urban green space, urban areas, cities, urban centres, towns and suburbs, peri-urban areas, urban tree canopy cover urban green spaces, settlements urban tree canopy cover (basis of the Tree Cover Density data under Copernicus)		Regulation (EC) No 1059/2003 (Article 4, LAU) Regulation (EU) 2021/696		national data on green urban areas urban tree canopy cover, available only for some cities	Copernicus Urban Atlas Land Cover/Land Use, High Resolution Layer Small Woody Features, GIS portal for trees Copernicus High Resolution Layer Tree Cover, Urban Atlas Land Cover/Land Use
Article 9	Restoration of the natural connectivity of rivers and natural functions of the related floodplains	rivers, floodplains, wetlands				new wetland data	TTB (hydrology)
Article 11	Restoration of agricultural ecosystems	agriculture lands agriculture areas within NATURA 2000 sites	Areas under Article 4 (14.7) habitat types in Annex I, measures that are necessary to re-establish the habitat types listed in Annex I, habitats of the species listed in Annexes II, IV and V to Directive 3243/EEC and of the terrestrial, coastal and freshwater habitats of wild birds falling within the scope of Directive 2009/147/EC Annex 4, list of biodiversity indicators for agro-ecosystems referred in Article 11 (2)	Regulation (EU) 2021/696 Annex 4 - Stock of organic carbon in cropland mineral soils, share of agricultural land with high-diversity landscape features		agriculture areas suitable for restoration ARKOD, CLC data ARKOD data only for agriculture areas under EAERD	ARKOD, CLC data ARKOD, CLC data
	1. Member States shall put in place the restoration measures necessary to enhance biodiversity in agricultural ecosystems, in addition to the areas that are subject to restoration measures under Article 4(1), (4) and (7) 2. Member States shall put in place measures which shall aim to achieve an increasing trend at national level of at least two out of the three following indicators for agricultural ecosystems, as further specified in Annex IV, measured in the period from 18 August 2024 until 31 December 2030, and every six years thereafter, until the 3. Member States shall put in place restoration measures which shall aim to ensure that the common farmland bird index at national level based on the species specified in Annex V, indexed on 1 September 2025 4. Member States shall put in place measures which shall aim to restore organic soils in agricultural use constituting drained peatlands.	agriculture lands	Annex 5 (common farmland bird index at national level)			precise areas of stock of organic carbon in cropland mineral soils identification of area suitable for restoration peatlands areas, areas of organic soils (very small areas in Croatia, around 250 ha)	NATURA 2000 areas, ARKOD data, NKS TTB (wetlands), geokemijski atlas, FAO UNESCO pedološka karta
Article 12	Restoration of forest ecosystems	organic soils in drained agricultural use constituting drained peatlands forest land, forest areas, forests under NATURA 2000 areas					data from Croatian forests, data from Ministry of agriculture
							✓ Complete

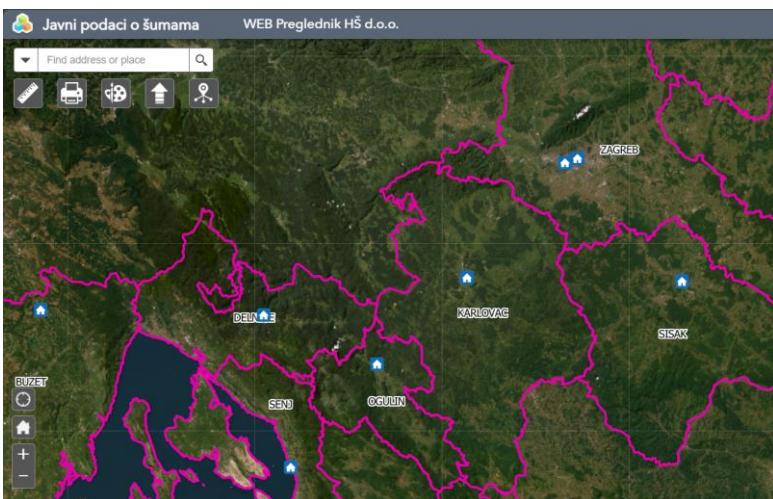

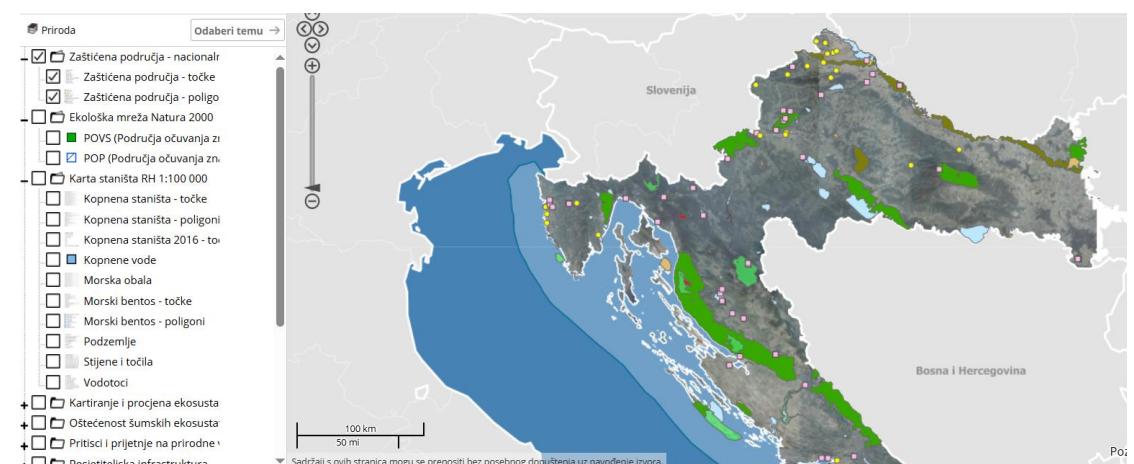

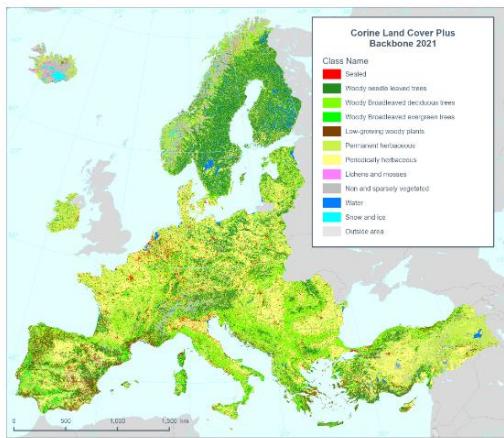

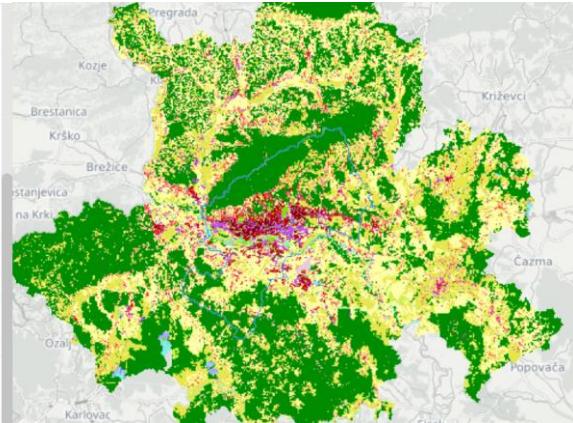

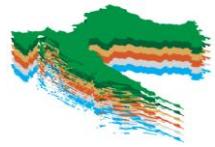

Važnost prostornih podataka u EU politikama

- 23 zakonska akta i strategije
 - posredna i neposredna potreba za prostornim podacima
- Analizirano ~136 članaka/stavki/aneksa:
 - ✓ Complete -20 (**14,70 %**)
 - ● Half Complete -79 (**58,09 %**)
 - ✗ No Data -37 (**27,21 %**)

- ▶ Coastal Zones
- ▶ N2K
- ▶ Riparian Zones
- ▶ Urban Atlas
 - ▶ Urban Atlas Land Cover/Land Use
 - ▶ Building Height
 - ▶ Street Tree Layer

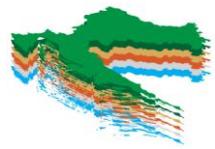

Zaključak

- stanje dostupnosti prostornih podataka u Republici Hrvatskoj je djelomično zadovoljena, ali su potrebna daljnja poboljšanja i istražovanja.
- izraditi detaljan popis nedostajućih skupova prostornih podataka.
- prioritizirati podatke ključne za provedbu navedenih EU legislativa (klimatska neutralnost, LULUCF, obnova prirode, praćenje šuma i tla...).
- jačanje kapaciteta i ulagati u prostornu „podatkovnu“ infrastrukturu
 - osigurati međusektorsku koordinaciju (bolje povezivanje sektorskih institucija (poljoprivreda, okoliš, šumarstvo, klimatska politika...))

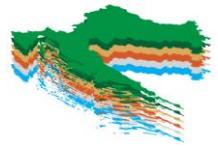

Zaključak

- bez sveobuhvatnih, točnih i ažurnih prostornih podataka – **nema učinkovite provedbe EU klimatskih i okolišnih politika.**
- potrebna su ciljna ulaganja i strateško planiranje podatkovne infrastrukture.

Hvala na pažnji!
